

Citi® One Card

Combine the services of our most popular cards to better manage and control your expenses across your entire organization

The Citi® One Card allows you to combine the features and benefits of Citi® Purchasing, Corporate and/or Fleet Cards into one efficient program, providing your organization with simplified control and reporting capability.

Understand your spending

We know that managing your expenses more efficiently and effectively requires paying attention to the details – identifying what is being purchased as well as where, when and at what cost. That's why the Citi One Card provides you with access to the most comprehensive and flexible information available. We offer consolidated global transaction information, so you can bring together the pieces of data that will help you plan for success.

Make informed decisions

For your organization to succeed, you need data that is timely, accurate and pertinent. Citi is committed to providing online, real-time management and reporting solutions that seamlessly integrate with your financial systems, helping you make informed decisions and comply with local regulations. These tools allow you to not only track expenses, but also obtain a better understanding of spending patterns.

Customize your reports using 600+ data points, consolidated from programs around the globe, so you can analyze the data that is most pertinent at any given time.

Put critical tools at your fingertips with Citi® Program Dashboard so you can utilize program data to drive compliance and efficiency across your organization.

Simplify report integration with our suite of standard and customized data files that can be effortlessly integrated with any expense management and ERP system.

Access statements with ease, 24/7.

Both you and your cardholders can view and download current and previous billed and unbilled transactions – all updated daily.

Benefits at a Glance For Your Organization

- An all-encompassing Commercial Card that integrates multiple programs into one
- A single program to manage, reducing Card requests, program maintenance, and increasing efficiency
- Merchant Category Code (MCC) templates to control a multitude of authorizations and limits
- One consolidated statement for each billing period
