

Citi® Virtual Card Accounts for Travel

A next-generation payment tool that increases transaction security and control for travel expenses

Citi's award-winning solution generates unique virtual card numbers, each carrying client-set controls and enhanced data based on each organization's specific purchasing needs. Citi Virtual Card Accounts (VCA) safeguards against unauthorized spending, helps prevent fraudulent purchases, provides transaction-level controls and simplifies reconciliation.

Benefits at a Glance

- **Customize transaction controls:** Companies can customize and preset authorization parameters as needed for each transaction.
- **Safeguard against fraud:** Virtual card numbers minimize exposure to fraud.
- **Make reconciliation fast, easy and flexible:** custom user-defined fields give you more.
- **Eliminate paper:** Replace manual, paper-based payments with a faster, more efficient and traceable electronic payables solution.
- **A consistent solution available for local-currency payments in 40+ countries and nearly 30 unique currencies.**
